In his statement for the year managing director Håkan Nyberg writes:

*"2017 was an eventful year. We have seen a number of changes in the bank, including the initiation of outsourcing our IT function where the extensive integration work that the outsourcing requires is under way and is expected to continue throughout the year. We continue developing our services, always focusing on the customer experience. We are happy that we have had growth in our markets with business volumes increasing by 7 percent. We saw a lower operating result compared to 2016 with impacts from certain non-recurring items from the previous year and this year."*

Ikano Bank's Sustainability report for 2017 (in English only) is also available via the site above.
